PROFILE SUMMARY

Final-year Cybersecurity Engineering student (Bac+5, EPI Digital School, Jun 2027). Built a Shift-Left GitHub Actions pipeline at FLEXOS from scratch: 3 sprints, 50+ automated scans, 314 IaC & secret findings surfaced before production. Final-year project: Azure attack/defense lab with Active Directory attack chains mapped to MITRE ATT&CK and a T-Pot honeypot logging 1,000+ live attacks. Hands-on focus across SIEM operations, threat detection, log analysis, vulnerability management and cloud hardening. AZ-900 certified; Security+ SY0-701 in progress. Seeking a 2027 PFE internship in SOC or DevSecOps.

PROFESSIONAL EXPERIENCE

DevSecOps Engineering Intern

Jun 2026 – Aug 2026

FLEXOS Tunisia

Sousse, Tunisia

- Designed & deployed a Shift-Left CI/CD pipeline on GitHub Actions; security checks ran automatically on every pull request across 3 sprints and 50+ runs.
- Integrated Checkov, Tfsec and Gitleaks to detect IaC misconfigurations and exposed secrets; surfaced 314 findings in severity-ranked HTML dashboards.
- Migrated hard-coded Terraform and Ansible credentials to HashiCorp Vault dynamic secrets, reducing the static credential attack surface.

Full Stack Developer Intern

Feb 2024 – Jun 2024

Axia Solution Tunisia

Mahdia, Tunisia

- Delivered a task-management web application end-to-end with secure REST API authentication, input validation, role-based access control and a relational database.

KEY PROJECTS

Azure Network Security Simulation – Final Year Project (PFA)

2026

- Constructed an Azure attack/defense lab with RCE, AS-REP Roasting, DCSync and Pass-the-Hash via Evil-WinRM; TTPs mapped to MITRE ATT&CK.
- Deployed T-Pot 24.04.1 on Azure; logged 1,000+ real attacks from global IPs, visualized in Kibana (Cowrie, Dionaea, Honeytrap).
- Defense stack: FortiGate firewall, site-to-Azure IPsec VPN, network segmentation and policy enforcement.

Shift-Left Static Analysis Pipeline

2026 — github.com/FOCUSMSK

- Pipeline chaining Checkov, Tfsec, Ansible-Lint, Gitleaks and HashiCorp Vault; ran against Terragoat and surfaced 314 prioritized findings with HTML remediation dashboards.

Python Open-Source Security Tools & Deep Learning

2026

- PortScanner:** Multi-threaded TCP scanner using ThreadPoolExecutor, scanning 1,000 ports across targets in ~40s with JSON/HTML export.
- Speech Emotion Recognition:** CNN+LSTM classifier trained on RAVDESS exploring anomaly-detection patterns for behavioral security analytics.

EDUCATION

EPI Digital School, Sousse

2024 – Present

Bac+5 Cybersecurity Engineering — Year 1: 17.13/20 — Year 2: 16.74/20

ISIMA Mahdia

2021 – 2024

Bachelor's in Software Engineering

CERTIFICATIONS & TECHNICAL SKILLS

Certifications: AZ-900 Azure Fundamentals, CompTIA Security+ SY0-701 (In Progress), Cisco CCNA 1-3, Cisco CyberOps, Cisco Ethical Hacker, Fortinet Threat Landscape 3.0, IBM Cybersecurity Fundamentals.

Security Tools: Kali Linux, Metasploit, Nmap, Burp Suite, Wireshark, Wazuh SIEM, T-Pot, FortiGate, Evil-WinRM.

Cloud & DevSecOps: Microsoft Azure, Terraform, Ansible, GitHub Actions, Checkov, Tfsec, Gitleaks, HashiCorp Vault.

Programming & Networking: Python, Bash, C, Assembly x86-64, Java, TCP/IP, DNS, VPN, IPsec.
